BUILT FOR TRAVEL COMPANIES

Run every journey. Control every number.

One connected workspace for sales, bookings, operations and finance. One marketplace for the services you choose to publish.

Product preview. Sample figures are illustrative.

SELL

Leads & quotations

DELIVER

Bookings & services

CONTROL

Finance & reporting

FROM ENQUIRY TO ACCOUNTS

Built around the way travel teams work.

Quotation is optional. Create a booking directly or carry the sales conversation forward.

01

SELL

Capture leads, assign a sales consultant and prepare optional quotations.

02

BOOK

Choose a customer, add travelers and combine package or tailor-made services.

03

DELIVER

Record flight segments, hotel stays, visas, transport and activities; coordinate suppliers.

04

ACCOUNT

Review cost, sale, currency and ROE; issue invoices and record partial receipts or payments.

Professional control, without repeated entry

- Reuse travel catalogues and searchable airline/airport references.
- Keep service revenue, direct travel cost and operating overhead distinct.
- Preserve company, role, branch and Customer access boundaries.

FOUR WAYS TO START

Marketplace in every plan.

Choose listing-only access or a connected ERP plan. Published prices are per company, excluding applicable taxes.

MARKETPLACE FREE

PKR 0 initially

For providers who need listings and enquiries, not the full ERP.

- Publish selected catalogue services on the public marketplace.
- Public company listings, provider profile and company branding.
- Listing enquiry inbox; keep internal-only services private.
- ERP bookings, accounting and finance are not included.

LAUNCH

PKR 5,000 / month

Or PKR 50,000 / year. Up to 20 active Staff accounts.

- Marketplace publishing, public listings and enquiry inbox.
- Sales, quotations, bookings and service operations.
- Invoices, RV / PV / JV vouchers and account statements.
- Company settings, branding, roles and permissions.

Customer portal accounts do not consume Staff seats. Availability of portal features depends on your plan and assigned permissions.

ROOM FOR YOUR NEXT STAGE

Grow with connected teams.

Marketplace access is included in Growth and Scale too. Final activation and commercial terms are confirmed during onboarding.

GROWTH

PKR 12,500 / month

Or PKR 125,000 / year. Up to 50 active Staff accounts.

- Everything in Launch, including Marketplace access.
- Multi-branch control and Customer portal permissions.
- Advanced finance and reporting workflows.
- AI Bot settings; messaging integrations require activation.

SCALE

Custom quotation

Capacity and rollout agreed around your company.

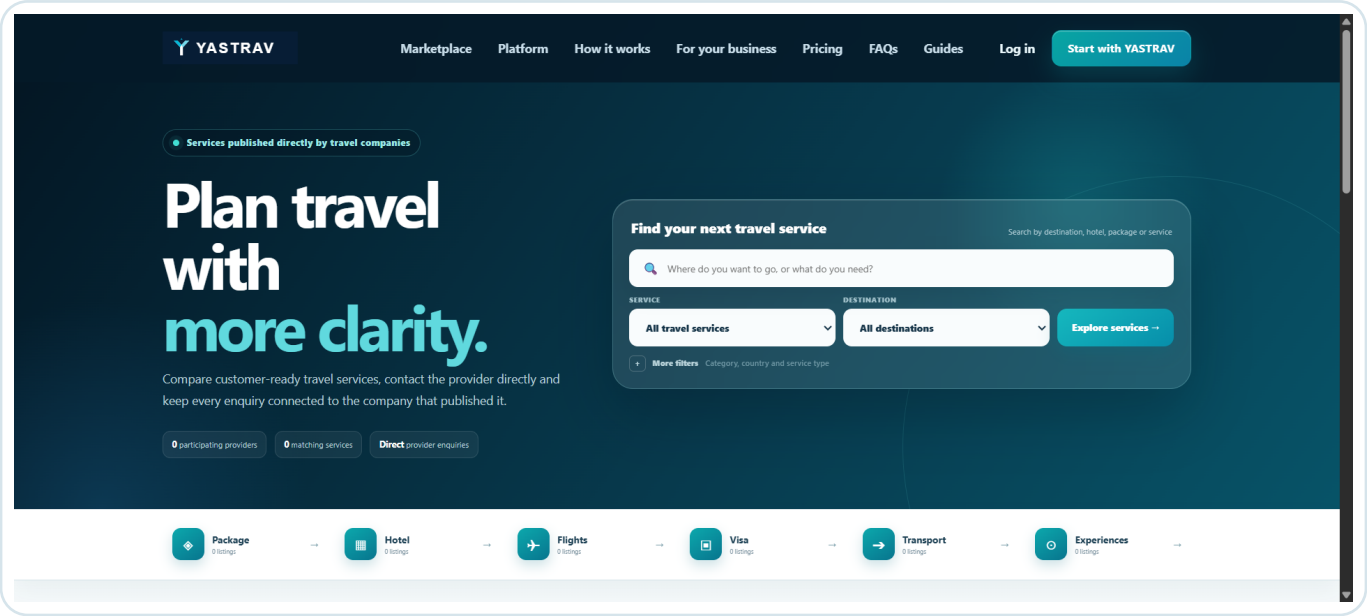

- Growth scope plus Marketplace access.
- Agreed Staff capacity and access configuration.
- Implementation planning for your operational structure.
- Priority onboarding under agreed commercial terms.

No plan provides access to another company's private records. WhatsApp / AI automation needs separately supervised hosting and configuration; a settings screen alone does not activate it.

REACH CUSTOMERS. KEEP CONTROL.

Your catalogue. Your public storefront.

Hotels, packages, visas, transport, tickets and activities can be presented through selected listings.

Marketplace preview. Listings support discovery and enquiries, not guaranteed availability.

Publish deliberately

- Choose which catalogue records are public and which stay internal.
- Add a clear title, destination, category, starting price and currency.
- Describe inclusions, important conditions and availability accurately.
- Review enquiries in your provider workspace; confirm supplier availability.
- Pause offers that should no longer be advertised.

Listings are offers, not confirmed bookings or visa approvals.

DESKTOP + INSTALLABLE MOBILE WORKSPACE

Your team. Anywhere.

Use the same authorized company workspace on desktop and supported phones. Live records require an internet connection.

ON ANDROID

- Open app.yastrav.com in a supported browser.
- Choose Install app when offered.

ON IPHONE

- Open app.yastrav.com in Safari.
- Share > Add to Home Screen.

Get your company started

- Choose a plan at yastrav.com/platform#pricing and submit your company request.
- The YASTRAV owner reviews the request and confirms activation and terms.
- Your Administrator configures company branding, branches, staff and permissions.
- Review an initial booking, invoice, voucher and statement before team rollout.

A few practical details

Phone notifications depend on browser permission, server scheduling and device support. WhatsApp is a separate integration. Offline mode is a safe connection-loss screen, not an offline accounting database.
